

# TESTRO BALANCE™

Natural Testosterone Support

BY DR. LARRY J. MILAM, H.M.D., PH.D., CLINICAL NUTRITION

## OVER TIME, YOUR BODY'S TESTOSTERONE LEVELS DECREASE

*Eventually, as testosterone levels shrink, some men begin to experience andropause, a condition comparable to "male menopause."*

### A drop in testosterone can lead to a number of problems†

Loss of muscle mass	Sleep problems
Loss of bone density	Emotional changes
Decreased physical endurance	Physical changes
Decreased memory ability	Increased fat
Loss of libido	Erectile dysfunction

Low testosterone levels are not unique to middle aged men. Even younger men can experience decreased testosterone levels due to certain diets and exercise programs.

With limited knowledge of a natural alternative, that does not involve strange or dangerous supplements, there has yet to be a great awareness and understanding of how to regulate testosterone levels naturally, until now†.

**Testro Balance™ offers a safe, food-based, natural alternative**

Unlike many testosterone supplement products, Testro Balance™ is NOT an androgen or androgen precursor.

**No exotic chemicals. No harmful side effects.**

Testro Balance™ promotes the body's natural testosterone levels safely and naturally and has scientific research to support it.

By adding Testro Balance™ to your health care regime, you can support your body's natural production of testosterone†.

Testro Balance™ is a natural complex known as calcium fructoborate and is found in many fruits, vegetables, and legumes.

Research has shown that this important molecule can support the body's hormone levels.

**Average total and free testosterone level changes in human subjects 3 hours after treatment.**
